micronetics®

Your european Distributor for
electronic Components & Systems

•About us

Innovative Interface between Suppliers and Customers

- 1979 -2019 – 40 years **micronetics**[®]
- 40 years trust into the successful tradition and rendition of services of a strong partnership.
- As Distributor of famous brands like 3M, Diodes Incorp., Kemet, Rohm Semiconductor, Central Semiconductor, Pancon or Schaltbau, we can solve a broad product spectrum for your purchasing and your development department of electronic components and systems.
- At Micronetics you do not only order electronic high quality components but also receive a comprehensive additional portfolio of services if you wish. Starting at well-grounded technical consulting over flexible logistic processes up to delivery services with absolutely transparency of costs.

Our Company's Philosophie

The success of our customers is the scale for our own success. The satisfaction of our customers is our daily motivation.

Our five principles für 100% customer's satisfaction:

Quality

Actuality

Professional Competence

Individual Services

Long Term Partnership

Quality...

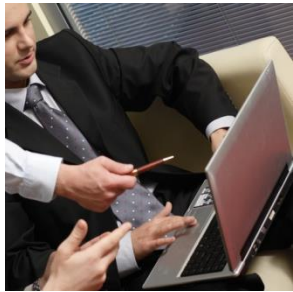

...is our supreme maxim

Our organization offers with 2.000 sqm storage area and 600 sqm office area sufficient space to fulfill customer`s requirements exemplary. An active quality-management of DIN EN ISO 9001:2015 , but also newest data processing technology and excellent organized logistics provides fast adaption and handling of orders “just-in-time”.

Our target at this point: Not only to fulfill our customer´ s wishes but to exceed them.

micronetics® - is standing for a well-rehearsed high-performance team of 34 employees, including 5 field sales engineers and 7 product specialists for telesales. Our tough-minded conception of quality and service level has made us to the company that we are today – one of the leading Component Distributors with Customers all over in Germany and the Neighbour EURO-countries, Swizerland and Great Britain.

Actuality...

...secures the competitive edge for our customers

Being a Component-Distributor of the leading suppliers we cover a broad product spectrum, always well assorted and state of the art for the demands of your purchasing and your development department for electronic components and systems.

We approve our strenght with a range of products of about 40.000 articles and constantly readiness for delivery of 18.000 articles stored at our 2.000 sqrm storage area with state-of-the-art logistics.

Our product portfolio guarantees not only excellent quality but also state of the art at every time in the fast moving market segments of electronic components to our customers.

**Professional
Competence...**

...makes the difference

A manageable team of well trained Employees with the Competence of many years and excellent knowledge of the Market and the Products offers you capability and flexibility of Specialists. Our Sales Team and the Product Managers are permanently trained with our Suppliers and are always talking on the level of the newest Technologies and Applications Engineering.

The whole Team ensures with it´s engagement and capability an over the average located dimension of Costumer´s satisfaction.

Individual Service

...definitely based on your wishes

The services we offer are aligned totally to the individual demands of our customers same as the communications. Sophisticated, customized services – just also in the field of logistics and delivery services – are self-evident for Micronetics.

Longrange Partnerships

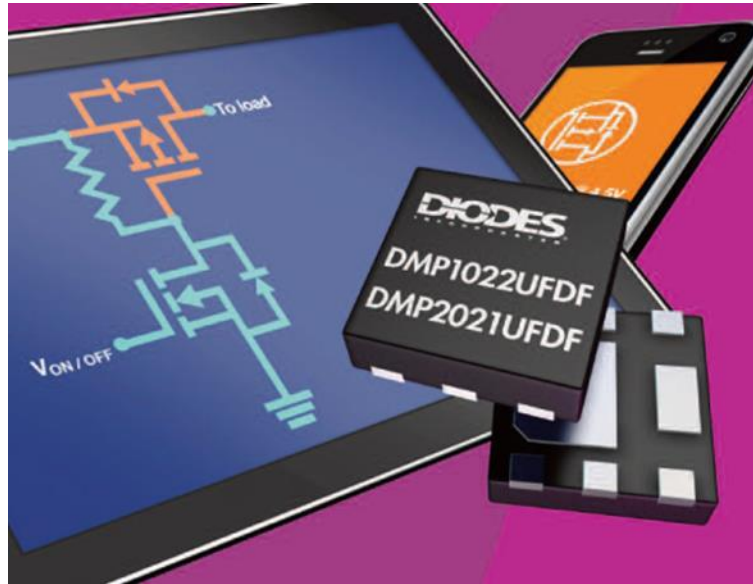

...are our basis for effective business relationships

We are partners for our customers. Customer relationships for long durations are close to our hearts and they are the best evidence of our successful occupation as distributor for electronic components. Our for longterm designed partnerships with selected suppliers assure continuity und reliability to our customers.

Our Product Range

Active
Passive
Mechanical

At Micronetics you get components of all famous manufacturer out of one hand.

With our broad product spectrum of active, passive and electromechanic components you can furnish optimal your demand of electronic components.

Furthermore we inform you about all product news, product change notifications and discontinuation informations at our website as well as additional with our customer's newsletter „Focus News“ about all actual trends according to the subject electronic components.

**Our additional
service offering**

Professional consulting – always according to the technologies and products state-of-the-art

Our sales engineers and product specialists facilitate you well-founded within all your technical and economic questions. With comprehensive know-how of the world wide supplier´s markets we sell products, not only fulfilling highest quality standards and comming up to the newest technology standards, but also fitting optimal for your demands.

Our subsidiary rendition oft services

Logistics Services - flexibel and tailor made for your requirements

On demand we will deliver you all out of one hand – also the complete logistics management. Our extensive proposal of Logistics-Solutions (Kanban-, Consignment Stock- or Security Stock, Barcodes, C-Part-Management, EDI) will be used tailored to suit market need and balanced to your concrete demands.

Our subsidiary rendition oft services

Delivery Services: The way of the goods to you.

We are delivering you your electronic Components if on stock directly after orders received, punctual to a wished delivery date , into your Consignment Stock or with Kanban-System „just-in-time“. If small deliveries, big and bulky Components or Moduls: Competent Delivery Services and Forwarding Agents are taking care that your components will arrive fast and reliable at your site.

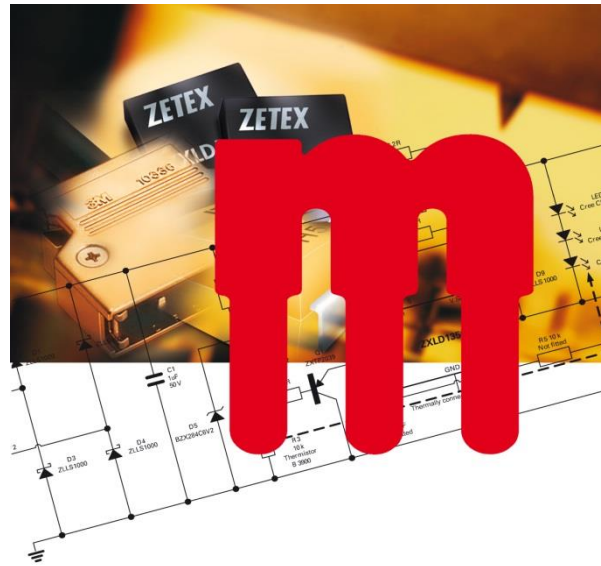

Our Delivery Service contains among others the following added services:

- The Certificate of Conformity (COC) certifies a EU-wide operating licence
- Preparation of electronic Components (e.g.. bending, cutting)
- Convection of cables
- Providing the prove of delivery and the possibility of Tracking
- Supplier´ s Declaration
- Certificate of Origin
